FOR FINTECHS, NBFCS & COMPLIANCE TEAMS

# Secure, auditable data intake for regulated finance.

KYC, vendor due-diligence and vigil-mechanism reports demand stronger controls than a generic form builder offers. VerifID Forms is built zero-knowledge from the ground up.

**RSA-3072**
+ AES-256 ENCRYPTION

**Zero-knowledge**
WE CAN'T READ YOUR DATA

**Free trial**
1 FORM · 50 RESPONSES

WHAT COMPLIANCE TEAMS WORRY ABOUT

- Sensitive customer and whistleblower data readable by a third-party vendor.
- Proving who accessed what, and when, to auditors and regulators.
- Vendor risk: every tool that can read your data is a tool you must audit.

# How VerifID Forms helps

### Zero-knowledge architecture

RSA-3072 + AES-256, with the private key generated client-side. VerifID has no access to decrypted responses.

### White-label KYC forms

Your brand on a KYC or onboarding form, with finance-oriented industry presets.

### Confidential whistleblower channel

Anonymous-yet-encrypted reporting suited to vigil-mechanism requirements.

### Embed in your own portal

Put the form inside your own site or app with an embed snippet; responses stay end-to-end encrypted.

## WHO IT'S FOR

Fintechs, NBFCs, lenders, wealth and insurance intermediaries; compliance officers and company secretaries.

## ALIGNED WITH

DPDP ACT 2023 · GDPR · HIPAA · E2E ENCRYPTED

VerifID Forms is built to support DPDP, GDPR and HIPAA-aligned data handling. Compliance also depends on your own policies and processes; this brochure is not legal advice. Because of the zero-knowledge design, a lost private key cannot be recovered by VerifID. Current plans and pricing: verifidforms.com/pricing.
