VERIFID FORMS

FOR HEALTHCARE & LEGAL PRACTICES

Confidential intake for clinics, hospitals and law firms.

Patient histories and case details are the most private data you will ever hold. Collect them in a form designed so the provider itself cannot read them.

RSA-3072
+ AES-256 ENCRYPTION

Zero-knowledge
WE CAN'T READ YOUR DATA

Free trial
1 FORM · 50 RESPONSES

WHY INTAKE IS THE WEAK POINT

- Paper forms and emailed PDFs are easily lost, copied or misdirected.
- Free form tools may analyse or monetise the data you collect.
- Privacy and professional-duty obligations rest on you, not your software vendor.

How VerifID Forms helps

End-to-end encrypted

Answers and uploads are encrypted before they leave the patient's or client's browser.

Healthcare & legal templates

Patient intake, consent and case-intake templates, ready to use.

Branded & trustworthy

Your practice's logo and colours, so people feel safe sharing details.

Capture location

Add a location field for site visits and field checks, alongside the encrypted answers.

WHO IT'S FOR

Clinics, hospitals, diagnostics, therapists, law firms and legal-aid organisations.

ALIGNED WITH

DPDP ACT 2023 · GDPR · HIPAA · E2E ENCRYPTED

VerifID Forms is built to support DPDP, GDPR and HIPAA-aligned data handling. Compliance also depends on your own policies and processes; this brochure is not legal advice. Because of the zero-knowledge design, a lost private key cannot be recovered by VerifID. Current plans and pricing: verifidforms.com/pricing.
